Summary

Full Stack Engineer specializing in the MERN ecosystem with demonstrated experience in architecting scalable web applications, designing high-performance backend systems, and delivering real-time, data-intensive solutions. Adept at building modular, production-grade systems leveraging RESTful services, WebSockets, and distributed architectures. Recognized for driving end-to-end feature development, optimizing system efficiency, and contributing to high-impact engineering initiatives in fast-paced environments. Seeking opportunities in Full Stack or Web Development roles.

Technical Skills

Languages: JavaScript (ES6+), SQL
Frontend: React.js, React Native, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, RESTful APIs, WebSockets, Socket.IO
Databases: MongoDB, Redis
Tools: Git, GitHub, Docker, Linux, AWS, RabbitMQ, npm
Concepts: Data Structures, Algorithms, System Design, Microservices Architecture, API Optimization, Agile Methodologies

Experience

Full Stack Developer Intern

Feb 2026 – Apr 2026

Centennial Infotech

Roorkee, India

- Engineered scalable and reusable UI components using React.js, enhancing maintainability and reducing redundancy across the frontend architecture.
- Orchestrated seamless integration of RESTful services with optimized state management, improving rendering efficiency and overall application responsiveness.
- Collaborated cross-functionally to define and refine API contracts, minimizing integration friction and accelerating delivery cycles.
- Established structured Git workflows, contributing to a more robust, version-controlled, and production-ready codebase.

Web Development Intern

Jun 2025 – Jul 2025

CertED Technologics

Remote

- Developed end-to-end application features within the MERN stack, contributing to scalable and modular system design.
- Designed and implemented RESTful API layers facilitating efficient data exchange and service communication.
- Optimized client-server interactions through strategic API call reduction and lightweight caching mechanisms.
- Ensured data consistency and integrity by aligning frontend rendering logic with backend data schemas.

Hackathon Mentor & Engineering Lead

2024 – Present

National Hackathons

- Led and mentored multiple engineering teams in high-intensity environments, delivering complete full-stack solutions within constrained timelines.
- Guided architectural decisions, debugging strategies, and system design approaches for 40+ teams across competitive events.
- Facilitated agile execution through structured planning, task prioritization, and rapid iteration cycles.

Projects

Crypto Trading Platform

React.js, Node.js, MongoDB

- Architected a full-stack trading platform integrating real-time market data, enabling dynamic price tracking and simulated trade execution.
- Designed secure and scalable RESTful services for transaction processing, portfolio analytics, and user management.
- Implemented authentication and authorization mechanisms using JWT and role-based access control.
- Enhanced frontend efficiency through performance optimizations, reducing redundant network requests and improving responsiveness.

Real-Time Chat Application

Node.js, Socket.IO, Redis, RabbitMQ

- Developed a distributed messaging system leveraging WebSockets and Redis pub/sub for real-time communication.
- Integrated asynchronous messaging pipelines using RabbitMQ to improve system resilience and scalability.
- Implemented caching strategies to optimize data retrieval and reduce database load under concurrent usage.
- Designed the system with microservices principles, enabling extensibility and cloud-native deployment readiness.

Education

B.Tech in Computer Science Engineering

2023 – 2027

Haridwar University

Uttarakhand, India

CGPA: 7.5 / 10.0

Certifications

- Web Development Fundamentals – IBM SkillsBuild
- Journey to Cloud – IBM SkillsBuild
- Front-End Development – Coursera (Meta)
- SEO Certification – HubSpot

Achievements

- Participated in multiple national-level hackathons, consistently delivering production-ready prototypes under strict deadlines.
- Recognized for mentoring and guiding development teams, contributing to improved project outcomes and technical proficiency.
- Continuously build and refine personal and open-source projects, focusing on scalable architectures and real-world applications.
